SOLUTIONS

PMS Group GmbH
Regionally based. In demand worldwide!

June 2026

Let us introduce ourselves!

PMS – your partner for success

The **PMS Group** has positioned itself as a comprehensive solutions provider for highly efficient and resilient electrical and thermal technology systems, setting industry benchmarks with strong regional roots and a global outlook. As a trusted development partner, PMS streamlines, automates, and digitizes complete systems, underpinned by profound process expertise and technical excellence.

Success through market presence

PMS – regional base. In demand worldwide.

Elektro- und Automationstechnik

Our core competences

Engineering/automation/project management

We believe that every project needs to be planned carefully according to the actual needs of each single customer while providing best support across the entire duration of the project: technical expertise, experienced project management while remaining flexible in every way.

Power Engineering

Project planning, network analysis or medium-voltage protection testing: we are your partner regarding individual customer requirements. We help you to enhance competitiveness and to increase and implement energy and overall efficiency.

Industrial assembly

We offer short, medium and long-term support, consultation and above all reliable implementation for all aspects of industrial assembly. No matter where our customers are based, we're here to assist you worldwide.

Elektro- und Automationstechnik

Our core competences

Service and maintenance

Focused on maintenance, improvement strategies or coordinating new projects – our portfolio covers a wide range of services. Getting to the heart of our customers' plants and production sequences is a major part of our service.

Installation

The expert personnel ensures a coordinated and secure transition of an installation or machine into safe, error-free operation, thereby generating lasting value.

EI&C for gas application and process technology

Thanks to our experience throughout the years we are specialized in meeting the needs of the petrochemical industry. We provide customized solutions with maximum safety and up-to-date expertise in standards and regulations in gas plants.

Competence Center Schaltanlagen

Manufacturing in the highest quality

PMS Competence Center Schaltanlagen GmbH specializes in a range of services, from individual manufacturing to the production of switchgear combinations in large quantities or tailored bespoke solutions. We provide a comprehensive offering under a single roof, serving as your experienced partner equipped with the finest manufacturing concepts. PMS boasts one of Austria's most extensive and cutting-edge switchgear manufacturing facilities.

Project Manufacturing

Our production achieves significant efficiency, cost competitiveness, and swift realization times by seamlessly integrating planning, manufacturing, and continuous automation under one roof.

Prototype and serial production

From the prototype phase onwards, we provide comprehensive support to our customers, developing series-oriented solutions. We design an optimal production layout and guarantee maximum output.

Component production (mechanical precessing)

Housing processing by laser or CNC milling machine, NC-controlled bending/punching machine.

Exclusive partner for valve technology in Austria

PMS valveTec GmbH is a partner of Valmet, a worldwide leading industrial company and provider of automation solutions for the mining, pulp/paper, oil & gas and recycling/processing industries.

Valve systems

Engineering, sales and delivery for brands

- VALMET
- MAPAG
- Jamesbury
- Easyflow by Neles

Services for valve systems

- Engineering, sales, delivery
- Predictive maintenance
- Condition monitoring
- Servicing, maintenance, assembly
- Retrofit & spare parts management

Servicing-centre offers

We have a 500 m² servicing workshop offering mechanical servicing, pneumatic servicing, electrotechnical servicing, and much more – all provided by our certified technicians.

Alternative Energy Systems

Our solutions for sustainable energy supply

PMS Alternative Energy Systems GmbH is the point of contact for day-to-day support and assistance with alternative energy systems, the smooth supply of spare parts, planning and installation through to preventive annual servicing. We are also a partner for the conception and implementation of holistic, alternative energy systems. Furthermore, we are the partner of choice in designing and implementing holistic alternative energy systems.

Consulting and Project Management

- Planning and consulting
 - New technologies
 - Optimisation of existing plants
- Digitalization strategy with competent partner companies

Technologies and products

- Fuel Logistics
- Upgrades & efficiency increase
- Grate firing & cleaning systems
 - Ash removal systems
- Modernisation and much more

PMS OAK 1,5 – 10 MW

The newly developed biomass boiler combines state-of-the-art technology with decades of expertise in the biomass sector.

Thanks to optimised grate geometry, intelligent control systems, and an innovative safety design, the boiler achieves an exceptionally high level of efficiency.

Digital Solutions

Customer-oriented total solutions for digital transformation

The staff of **PMS Digital Solutions GmbH** are at your disposal for designing your digitalization projects. No matter what stage of development you are at. From consulting and strategy development to complete care and execution of your digitalization projects, PMS-DS offers you a full service solution as your partner.

Consulting and Project Management

- Digital transformation
- Digitalization and Industries 4.0
 - Digitalization strategy
- New Work / Digital Workplace

Business models and processes

- Digital Business models
- RPA – Robotic Process Automation
 - Data Solutions
- Data Science – Big data

Technologies and development

- App development
- AI – Artificial Intelligence
- IOT – Internet of Things
- AR/VR – Augmented & Virtual Reality
- Cyber Security & Defense

Successful learning and counseling in focus

The **PMS Technikum Lavanttal GmbH** is a place of enthusiasm where the joy of learning, mutual exchange, and development take center stage. As an educational and consulting center, we also offer our services beyond the corporate group.

Apprenticeship Training

- In-house training workshop with top-notch infrastructure and a dedicated apprenticeship supervisor
 - Job rotation
 - Mentorship models
- Individual supplementary training

Academy

- Platform for targeted personnel development – from expertise to personal growth, catering to both apprentices and executives
 - PMS Academy Program
- Specialized programs and courses

Coaching & Consulting Cooperation & Project Development

- Coaching & Personal Development
- Management and Strategy Consulting
 - Regional Innovation Hub
- Carinthia University of Applied Sciences
 - Partnership Models

Powerful Solutions International

Your partner for the provision of qualified personnel

PSI – Powerful Solutions International GmbH PSI – Powerful Solutions International GmbH provides and leases personnel for the industrial sector. Employees receive ongoing training in order to meet the demand for highly qualified personnel.

Provision of personnel

PSI provides workers and places them, on a short or long term basis, with other companies that are in need of additional manpower.

Personnel placement

PSI assists you in the search, selection and presentation of suitably qualified personnel and leaves them to companies.

Personnel consulting

Our experts can help you identify talent, develop career strategies and optimise your effective HR strategies.

Services für Analysis and Surveillance

PMS SAS GmbH is a service provider for innovative drone operations, offering both standardized solutions and customized applications – ranging from individual flights and training to automation solutions with AI-powered image analysis, cloud integration, and modular hardware and software.

Surveying of mountain streams for municipalities and regional authorities

No "inaccessible sections": Issues are identified within 48 hours post-flight and presented in a report, complete with visualizations and documentation compliant with forestry legislation.

Consulting, project services and sales for commercial and private customers

Training guidance, managing projects, drone consulting and selling DJI drones with compatible accessories.

(PV-) systems inspections for companies

Detection of defects in PV systems, regular aerial inspections and detailed inspection reports for buildings.

AC/DC PowerSphere

A Joint Venture between PMS and electrify

AC/DC PowerSphere GmbH is a full-service solutions provider, delivering everything from a single source — covering analysis and planning to installation, operation, and optimization of AC and DC energy systems. Our comprehensive after-sales service ensures smooth operations and adds value for your business with innovative, reliable, and scalable energy solutions focused on stability, innovation, and cost-effectiveness.

Energy Management & Energy Generation Systems

For the generation and use of renewable energy, sustainable and modern system solutions that efficiently monitor, control, and optimize energy consumption are essential.

Advanced Storage Technologies & Smart Micogrids

Smart grids enable efficient energy distribution and resource management. Advanced storage solutions enhance the reliability of the energy supply.

Our partnerships

Strong partners are the key to success!

We tackle customer-specific electrical engineering and automation challenges every day. To maintain and hone our strength and core competence in the long run, we team up with strong partners.

The PMS family

Our focus is on people

Employees are an essential element of our success

An above-average connection of our employees is the result of a good work-life balance which is due to flexible working hours and involvement of families at company events. Another benefit are free delicious meals for our employees on a daily basis.

Responsible employee management and development are the hallmarks of our appreciative and informal corporate culture and are strengthening the cohesion within the PMS-Team.

Corporate culture - values

Appreciation, honesty, openness, fairness, eye level, solidarity, trust, decisiveness and courage are the essentials of our corporate culture. The practiced values are shaping the daily interaction and provide orientation.

Development opportunities & future prospects

Within the PMS Academy we emphasize individual support of our employees, qualitative apprentice training and further education – resulting in TOP qualified employees who have varied career opportunities.

Sustainable business management

How we interpret corporate responsibility

Health and safety

In order to ensure that the topic is well-embedded in the management and to create awareness, inspections and site visits by the management take place at regular and planned intervals.

Safety at work

We are constantly working to improve the occupational health and safety conditions for our employees. We always keep an eye on the long-term goal of "zero accidents at work".

Environmental policy

As a modern, dynamic and forward-thinking company, PMS is committed to the highest quality, safety, environmental and energy efficiency standards.

We are setting ambitious goals – finding customized solutions remains a fundamental principle.

“

Operational health management – a major concern for our top management...
